

ROVER TO MARS

R2M

Team Weingarten

Who are we?

We are an institution run by students at RWU, focusing on building a rover to compete in various competitions all around the world.

What are our goals?

We plan to take part in the Canadian International Rover Challenge which is from the 9-12 August 2024 and takes place in Drumheller, Alberta, Canada.

Have we competed beforehand?

Yes! Here are a few photos of the previous team's rover from 2019 :

How far is our rover from being done?

Since we have just kick-started an organization that was last active in 2020, we are still in the beginning stages of building our rover.

Nevertheless, we will start with the construction in the upcoming days.

What is CIRC about?

The Canadian International Rover Challenge (CIRC) is a prestigious global competition where university teams construct and operate rovers to complete tasks simulating real-life scenarios on Earth, fostering innovation, collaboration, and advancing space exploration technologies.

Why join our team?

If you are interested in mechatronics, robotics, or feel like organizing a capable team, this student organization is the right place for you to learn with hands on experience!

How can you contact us ?
